Innovators of competitively priced products providing creative solutions to consumers' security needs.

Press Release

FJM Security Products Innovates Combination Key Cabinets with Keyless Convenience and Reliability at a Competitive Price!

Seattle, WA, September 2nd, 2011: Why hassle with keys to secure and manage keys? With the new line of durable and reliable combination key cabinets from KeyGuard, you don't have to.

The durable KeyGuard Combination Key Cabinets are constructed entirely of heavy gauge steel, including the high capacity key hooks and continuous "piano" hinge. With mounting supplies and multi-colored key tags included in the box, these combination key cabinets are easy to install and easy to organize.

Available in 48 and 122 key models, the KeyGuard Combination Key Cabinets are secured by the Combi-Cam, a three-dial combination cam lock with 1,000 possible codes. The solid metal, three-dial Combi-Cam has been on the market for years as a solid performer in other applications without the reliability issues seen with other types of combination locks on key cabinets. Not only does Combi-Cam provide the convenience of keyless access, it also provides flexibility with easy-to-change combinations at any time.

Consumers benefit from the variety of free resources available online such as replacement labels for the key tags, sign-out sheets and key location charts available at www.combination-key-cabinet.com.

Combination Key Cabinet features:

- Heavy, 16 gauge steel
- Steel key hooks
- Continuous "piano" hinge
- Reliable 3 dial combination security
- 1,000 possible combinations
- Change code easily in seconds
- All metal construction
- Color coded key tags included
- Mounting hardware included
