Press Release

New Dust Shutter and High Security Cam Locks Available

Seattle, WA, January 19, 2012: New dust shutter and high security cam locks are now available from FJM Security Products. The locks are an addition to the variety of in stock cam locks, push/plunger locks, glass locks, cylinder locks, switch locks, miniature locks and deadbolt locks that have been popular with large and small OEMs.

The dust shutter cam locks offer internal springs with a loaded dust shutter and weather resistance. These locks come in the following cylinder lengths - 5/8", 7/8", and 1-1/8", with a chrome finish. Internal o-ring prevents moisture from penetrating the lock. The new high security cam locks come with the Pagoda lock system – much higher security than the tubular or DUAL high security cam locks. These locks also come in the following cylinder lengths - 5/8", 7/8", and 1-1/8", with a chrome finish.

The locks are made for installation in a multitude of applications, with the following features -

- Optional straight and offset cams, and dust cap
- One and two key pull
- Keyed alike or keyed different
- Zinc alloy housing

FJM Security Products (www.fjmsecurity.com) is the manufacturer of numerous innovative security products such as the Combi-Cam cabinet locks, Padlockable Cam Locks, Combi-Ratchet Combination Ratchet Locks, Combi-Bolt Combination Bolt Locks, SOBO High Security Padlocks, ShurLok and KeyGuard Key Storage, and HitchSafe.
