* Note- when using the MobiSafe with headphones, the iPod and iPhone work best without the additional larger protective cases and the below style of headphone jack .

To secure your valuables –

1. Turn the dials to the opening combination.
2. Press the Opening Button to detach the Hard Case from the Locking Head.
3. Load your memory card, cash, keys, credit cards, digital camera, cell phone, iPod, MP3, or other valuables into fitted Hard Case.
4. Attach the Hard Case back to Locking Head and scramble the dials.

To secure the MobiSafe cable-

1. Turn the dials to the opening combination.
2. Slide release knob to the left as shown below to release Cable Head
3. Loop the cable around the object you wish to secure the MobiSafe to.
4. Insert the Cable Head back into the Locking Head and scramble the dials.

Locking Head:
