New Design – Combi-Bolt, Combination Bolt Lock

Offers Reset Screw for Increased Safety

Seattle, WA, January 21, 2013: FJM Security Products is proud to announce an updated design to the Combi-Bolt locks – the addition of a reset screw for increased safety and ease of use.

The Combi-Bolt locks offer an innovative keyless security solution without the hassle of keys. The new design with the recoding screw reduces the risk of accidently putting the lock into reset mode. This solid, beefy all metal sliding bolt provides the convenience of one locking device with the security of a hasp-and-padlock design. The Combi-Bolt comes with pick resistant dials, solid steel sliding bolt, and one-way security screws (which deliver an extra level of protection). The lock can be installed in both flush and recessed installations. Combi-Bolt is great for sharing access with others, and the combination can easily be reset at any time. The lock is a great flexible solution for sheds, barns, equipment, tools, livestock, doors, gates, fences, windows etc. This lock comes in both black and chrome finishes.

- Ability to install in recessed or flushed mounting
- Secure – 10,000 possible combinations
- Pick resistant dials and one-way security screws
- Weather resistant
- All metal construction
- Quick combination changes

FJM Security Products' (www.fjmsecurity.com) mission is to supply resettable combination security devices and other quality hardware products in a manner that exceeds our customers' expectations for value, service and innovation. Our other products include Combi-Cam Cabinet Lock Series, Padlockable Cam Locks, Combi-Ratchet Combination Ratchet Locks, Combi-Bolt Combination Bolt Locks, SOBO High Security Padlocks, ShurLok and KeyGuard Key Storage, HitchSafe, and other keyed cabinet locks. FJM Security Products, a division of Frank J. Martin, has been in business since 1957. Check out **www.tinyurl.com/fjm1786** for our new online product catalog.
