Press Release

New Inverted Version of Combi-Cam Ultra Combination Locker Lock Offers Master Key Override & Code Retrievable Function

Seattle, WA, 3/16/15: The Combi-Cam Ultra by FJM Security Products is now available inverted and perfect for drawer and locker applications. The inverted combination drawer lock with master key override and code retrievable capabilities comes in black finish. The Combi-Cam Ultra Combination Locker Lock offers master key override and code retrieval. The inverted Combination Locker Lock has 4-dials (10,000 possible combinations). The Combi-Cam Ultra inverted version is ideal for wood locker and drawer applications.

The Combi-Cam Ultra Combination Locker Lock has up to 10,000 possible combinations available and master key access, allowing for dual access with both keys and combinations. The innovative combination inverted locker lock is perfect for lockers at fitness clubs, health centers, universities, and athletic centers. The design offers combination capabilities with innovative code retrieval function. Combi-Cam Ultra Combination Locker Lock, made of heavy duty die cast metal, offers higher security, pick resistant keyways. The inverted combination locker lock is ideal for locker applications, cabinets, drawers, storage, etc - anywhere that needs the flexibility of combination retrieval or multiple person access. The Combi-Cam Ultra may be purchased from leading hardware distributors.

- easy-to-use knob with distinct, user-friendly open and close indicators, and no housing to rotate which can deface surface
- master key allows users to override the current combination, and retrieve the current combination
- fits a maximum material thickness of 7/8" and retrofits any standard cam lock
- inverted combination locker lock comes in three cylinder lengths (5/8", 7/8", and 1-1/8"), and black finish
- wide variety of straight and offset cams available for the inverted combination locker lock
