Press Release

New Combi-Cam E-Series Eco-Friendly Electronic Cabinet Lock

Up to 10 Year Battery Life - Compact Design - Competitive Pricing

Seattle, WA, October 1, 2013: FJM Security Products is proud to announce an addition to the Combi-Cam locks - the Combi-Cam E-Series – electronic cabinet lock with master/manager code, one-time-use functionality and eco-friendly lock with up to 10 year battery life.

The Combi-Cam E-Series electronic cabinet lock gives customers an environmentally friendly application with up to 10 year battery life – drastically reducing the hazard of battery waste. This means no need to hassle with changing out the battery often! With manager/master code functionality, the E-Series cabinet lock offers both surface and semi-flush mounting – perfect for cabinet doors or lockers. While most electronic cabinet locks require a square hole cutout, the E-Series simply retrofits a standard cam lock with 5/8" to 3/4" diameter. The E-Series electronic cabinet locks have an attractive, ergonomic design, perfect for metal and wood cabinets, lockers, healthcare use, fitness centers, etc. The E-Series locks have the flexibility of installation with cams or deadbolt (15 mm or 25mm). The electronic cabinet locks can be installed for right and left hand installations and are ideal for locker applications, cabinets, drawers, storage, etc - anywhere that needs the flexibility of master/manager code or one-time-use functionality.

- Electronic cabinet lock offering functionality of master/manager code
- Eco-friendly lock with up to 10 year battery life!
- No square hole cut-out required for electronic cabinet lock
- Can convert to one-time-use cabinet lock
- Cabinet lock with sleek, ergonomic compact design
- Competitive pricing
