FJM Security Announces KeyGuard Large Capacity Lock Box

KeyGuard Pro Large Capacity provides all the benefits of the KeyGuard Pro, with a larger storage area and easy installation

Seattle, WA, March 1, 2014 - FJM Security Products announces the addition of the new innovative KeyGuard Pro Punch Button Large Capacity Lockbox. The KeyGuard Pro offers a patented punch button system, as the only lock box that allows entry with easy to remember alpha and/or numeric combinations, in a familiar phone keypad layout punch button system.

Due to the success of the KeyGuard Pro an All metal Large Capacity KeyGuard Pro. The Large Capacity KeyGuard Pro has a front loading door with spacious storage inside that allows both keys and cards to be secured. The Large Capacity version offers ½" of extra depth which allows for even more key storage! The NEW KeyGuard Pro Large Capacity includes mounting hardware to install in your desired location. The KeyGuard Pro utilizes both word and numerical combinations. Word combinations are easy to remember, allowing for marketing messages, company names, personalized combinations and more. The protective cover is optional and can be imprinted upon with company logo and information as a marketing medium. The large, familiar phone key pad punch buttons allows easy entry of combinations. The Large Capacity KeyGuard Pro offers better value with more features, better quality and higher security... all at a more competitive price!
