

*Traditional
Sliding Bolt
with an
Innovative
Twist!*

The Combi-Bolt offers convenient, keyless security with 10,000 possible codes and no need to hassle with keys!

The solid, beefy, all metal sliding bolt (3/8" dia.), provides the convenience of one locking device and is more secure than hasp-and-padlock designs with exposed shackles.

4 Dials = 10,000 Combinations

Anywhere Keys are a Hassle!

Traditional Sliding Bolt with an Innovative Twist!

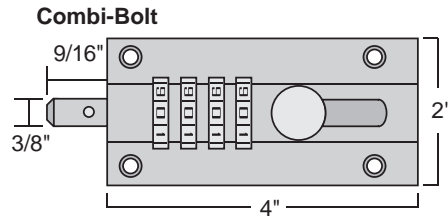

Easy Installation *(Tools Required - Drill and Screwdriver)*

Recessed Mounting

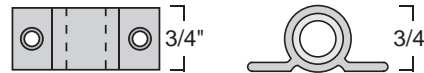

1. Position the **Strike Plate** in its intended position. The 5/8" cutout in the **Strike Plate** must be over a recess in the door frame.
2. Mark the positions for the screws on the mounting surface.
3. Drill pilot holes for the screws.
4. Screw the **Strike Plate** into place with the included **One-Way Screws**.
5. Complete steps 1 thru 3 for Flush Mounting.

Flush Mounting

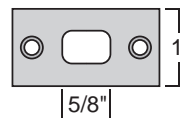

1. Hold the **Combi-Bolt** in its intended position, then mark the positions for the screws on the mounting surface.
2. Drill pilot holes for the screws.
3. Screw the **Combi-Bolt** into place using the included **One-Way Screws**.
4. Install the **Bolt Receiver**. Before screwing in the **One-Way Screws**, be certain the **Bolt** slides smoothly into the **Bolt Receiver**.

Bolt Receiver for Flush Mounting

Strike Plate for Recessed Mounting

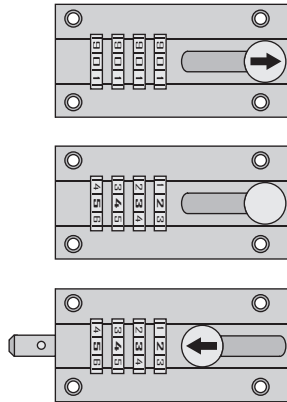

One-Way Screws

Set Your Combination *(Factory Default Combination: 0-0-0-0)*

1. Set dials to the current combination.
2. Lift the handle up and then slide the bolt back completely.
3. Set the dials to the new combination & make a note of it.
4. Lift the handle up and slide the bolt forward completely.
