## New Horizontal Version of Combi-Cam E Electronic Cabinet Lock

**Seattle, WA, March 18, 2015:** FJM Security Products is proud to announce an addition to the Combi-Cam E-Series electronic cabinet locks - the horizontal Combi-Cam electronic cabinet lock with master/manager code, one-time-use functionality and the world's only eco-friendly lock with up to 10 year battery life!

The horizontal Combi-Cam E-Series electronic cabinet lock gives customers a locking option for applications that lack height such as mailboxes, desk drawers, etc. The left hand horizontal model (knob on left, numbers on right) gives users quick access to a wide range of cabinets, lockers and mailboxes. With manager/master code functionality, the horizontal E-Series cabinet lock offers both surface and semi-flush mounting – perfect for mailboxes, cabinet doors or lockers. While most electronic horizontal cabinet locks require a square hole cutout, the E-Series simply retrofits a standard cam lock with 3/4" diameter. The horizontal electronic cabinet locks have an attractive, ergonomic design, perfect for metal and wood cabinets, lockers, healthcare use, fitness centers, etc. The Combi-Cam E locks have the flexibility of installation with cams or deadbolt (15 mm or 25mm). The horizontal electronic cabinet locks can be installed for left hand installations and is ideal for locker applications, cabinets, drawers, storage, etc - anywhere that needs the flexibility of master/manager code or one-time-use functionality.

- Electronic cabinet lock offering functionality of master/manager code
- Think green - world's only up to 10 year battery life!
- No square hole cut-out required for electronic cabinet lock
- Can convert to one-time-use cabinet lock
- Cabinet lock with sleek, ergonomic compact design

FJM Security Products' ([www.fjmsecurity.com](http://www.fjmsecurity.com)) mission is to supply resettable combination security devices and other quality hardware products in a manner that exceeds our customers' expectations for value, service and innovation.
